DYNAMICS 365 CE FOR MANUFACTURING

UNLOCK INNOVATION WITH A LEADING CRM FOR MANUFACTURING

Boost Sales Productivity

Close books faster, deliver robust reporting, increase profitability with business intelligence, and ensure global compliance.

Provide Next-level Customer Service

Take advantage of intelligent routing for quick resolutions, resolve issues before they start with predictive care, and personalize service with a complete view of each customer's journey.

Simplify the Warranty Registration and Claims Process

Simplify the way you handle warranty claims, including capturing key information from the customer, creating work orders for repairs, submitting required documentation, and coordinating OEM review and claim approvals.

Improve Demand Forecasts

Use sales pipeline data to build more accurate revenue and materials/resource forecasts. Allocate forecasts across multiple time periods within a single sales opportunity.

Improve Distributor Relationships

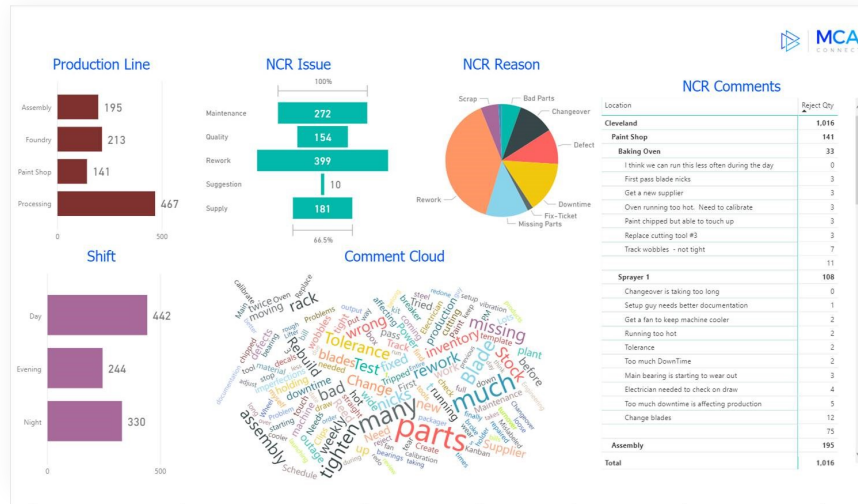

Improve sales efficiency, reduce response time, and cut internal workload by providing product availability and pricing information to dealers, distributors, and service partners through self-service portals.

Gain Actionable Manufacturing Insights

Leverage AI capabilities within Sales Insights to accelerate sales, build better customer relationships, automate tasks, and proactively pursue opportunities at the right time with the right message. Combine machine data with insights from equipment operators to improve equipment availability and boost overall equipment effectiveness.

DYNAMICS CE FOR MANUFACTURING INCLUDES:
